

***HACCP plans for on-farm storage******Outloading***

<input type="checkbox"/>	<b>29. Determining if grain meets market standards</b>
<input type="checkbox"/>	<b>30. Commodity is infested at time of outloading</b>
<input type="checkbox"/>	<b>31. Commodity is infested in transit</b>

<b>Task 29: Determining if grain meets market standards</b>		
<b>Hazard:</b> Grain may be rejected because it does not meet market specifications	<b>Preventive measure:</b> A higher standard of care is required because standards are harder to meet by individuals due to the averaging effect of the pool	<b>Critical control point (CCP):</b> Outloading
<b>Critical limit:</b> Limits are set by the market and by national and international regulations	<b>Monitoring:</b> NA	<b>Corrective action:</b> NA
<b>Verification/records:</b>	<b>Where to look:</b> See sections on sampling <a href="#">□</a> , outturn standards <a href="#">□</a> , market standards <a href="#">□</a>
