

HACCP plans for on-farm storage***Pre-planting phase***

<input type="checkbox"/>	1a. Preparation of cropping plan—toxic weeds
<input type="checkbox"/>	1b. Preparation of cropping plan—heavy metals
<input type="checkbox"/>	2. Determination of on-farm storage requirement
<input type="checkbox"/>	3. Purchase of new storage

Task 1a: Preparation of cropping plan—toxic weeds		
Hazard: Land may not be suitable for grain growing due to persistent toxic weed problem. Toxic weed seeds may contaminate future crop	Preventive measure: Avoid unsuitable land or eliminate weeds	Critical control point (CCP): NA
Critical limit: Limits including ZERO limits are set in customer's receival standards	Monitoring: NA	Corrective action: All unacceptable weeds to be eliminated by cultivation or herbicide spraying
Verification/records: Farmer should maintain record of measures taken	Where to look: See standards for prohibited and restricted weeds □ (refer to tables 2–4)
