

grainstorage WORKSHOP

**5 simple things you can do better
when storing grain and seed on farm**

Getting the most out of your silos

Preventing and controlling weevils in
stored grain

Aerating grain for cooling and drying

Pressure testing silos

Storing pulses and oilseeds *+ more*

**5pm Tue
6th March
Silos at Sawyer's
Wimmera Farm
DALWALLINU**

Presented by: **Ben White** on behalf of the **Grain Industry Association of WA (GIWA)**. An experienced agricultural engineer, Ben has been working on the **GRDC grain storage extension project** for the past three years.

Time and interest permitting, as the General Manager of Research for Kondinin Group, Ben would also be pleased to discuss other areas of interest to the group
