

GRAIN STORAGE WORKSHOP

Come along to this workshop where northern grain storage specialist Brock Dembowski will provide tailored information about storing grain in Far North Queensland, with a focus on managing wet cereals.

Brock is the Northern Grain Storage Extension Officer for the GRDC National Grain Storage Extension Project. Andrew Kotzur will share insights from his experience with aeration drying in silos.

MANAGING GRAIN IN THE NORTH

- Pest spectrum and resistance update
- Management strategies for pests
- Structural treatment options
- Fumigants and reducing resistance
- Managing wet grain in your climate
- Drying grain (focus on aeration drying)

... and much more
